

AMOUNT ADDED TO TOTAL U.S. FEDERAL DEBT BY PERIOD 1944-2014 (\$ TRILLIONS)

(Source: U.S. Dept. of Treasury)

Another look at the dramatic change in fiscal policy that developed coming out of the ruinous decade of the 1970's. Repeated failure by successive Presidents and members of Congress to properly manage America's finances has left the nation in peril in 2015. The Congressional Budget Office projects another \$7 billion in deficit spending through 2025 if nothing changes in DC. That would bring total outstanding U.S. federal debt to over \$25 trillion. It will be the death of this great country. Fiscal year 2015 is projected to involve another \$400 billion deficit. Votes better get involved. *The Treasury budget is released monthly for the prior month.*

2015 (\$ BILLIONS)
